TAB REFRACTORY HAS THE SOLUTION...

COMPLETE RELINES, INNOVATIVE FURNACE REPAIRS AND MAINTENANCE

Latest Refractory Technology and Materials Selection with Worldwide Focus on Primary, Secondary and Recycling Casthouse Furnaces

- All plant types – including master alloys, foundries
- All types of furnaces – reverberatory, melters, holders, top loading, static, tilting, rotary, tower melters, die casters
- Complete relines, innovative furnace repair solutions and maintenance
- Specialists in increasing furnace capacity

REFRACTORY PROBLEMS?

Corundum growth~
formation of oxide growth in the
refractory lining, reducing furnace
efficiency and eventually leading to
lining failure.

Chemical attack~
degradation of furnace lining due to
combination of high temperatures
and attack by fluxes.

Mechanical damage~
damage to door surround area from
scrap charging and cleaning
practises.

WORLDWIDE

WE HAVE THE SOLUTION!

- Material knowledge
- Increase refractory lining life
- Reduce furnace downtime
- Increase productivity

PyrotekTM
Improving Performance

TAB Refractories are renowned for high quality refractory design and installations. From the early beginnings as a small family run refractory contracting company in Warrington, UK, TAB has grown into one of the world's leading independent refractory installation companies.

Established in 1974, TAB specialises in the non-ferrous metals melting industries, and are world leaders in lining aluminium melting and holding furnaces.

TAB Refractory, a division of Pyrotek Inc.
Unit 7, Parkdale Industrial Estate, Wharf Street
